④ In the event that mountains such as Mt. Omuroyama or Mt. Nagaoyama to the northwest erupt

Because records show that the volcanic activity of even remote mountains can cause eruptions, the race will be cancelled. Officials will facilitate appropriate evacuation protocol based on ① - ③. Because the Fuji Subaru Line is to the northwest it will not be used during evacuation. The Yoshida Trail and Takizawa mountain path will be used in its stead.

⑤ In the event that mountains such as Mt. Houteizan or Mt. Kansuyama to the south erupt

Because records show that the volcanic activity of even remote mountains can cause eruptions, the race will be cancelled. Officials will facilitate appropriate evacuation protocol based on ① - ③.
